

Nimit Tanboontor

nimittanbooutor@gmail.com — 0947041119
github.com/6531503042 — linkedin.com/in/nimitben/

SKILLS

Computer Languages: Go, Java, TypeScript, Dart, Python, SQL

Frameworks: Go(Fiber), Go(Echo), Spring WebFlux, FastAPI, NestJS, Next.js, React, Nest.js

Tools: Docker, gRPC, Kafka, Redis, Firebase, PostgreSQL, MongoDB, Supabase, Sqliite, Vercel

Architectures: Microservices, Clean, Adapter, Modular

Languages: English(Upper Intermediate), Thai (Native)s

EDUCATION

- **Mae Fah Luang University** 2022 – Present
Bachelor of Science in Software Engineering Chiang Rai, Thailand
 - Expected Graduation: 2026
 - Courses: Distributed Systems, AI, Web Dev, Mobile Dev

EXPERIENCE

- **Backend Developer – Garena Online Management** Early 2025
Freelance — (Private source)
 - **Delivered a fully functional football vote prize system in 3 days** for an urgent event.
 - Handled **1,000+ concurrent users**, with real-time admin dashboard and CSV import/export tools.
 - **Tech Stack:** Golang, Next.js, MongoDB
- **Fullstack – HLLC-2025 MFU Campus Activity App** May – Jul 2025 (Currently)
MFU – Fullstack — (Private source)
 - **Architected and implemented** a campus-wide platform for **3,000–4,000+ users** with real-time scalability.
 - Developed core features including **real-time check-ins**, gamified scoring, CMS, and interactive 3D modules.
 - **Tech Stack:** NestJS, Expo, React Native, Golang, Kafka, Reids, Blender

PROJECTS

- **DevWithMe – Productivity Dashboard (Personal Project)** 2024
devwithme.vercel.app — github.com/6531503042/devWithMe
 - Independently built a full-featured productivity web app to manage tasks, study sessions, finances, and goals.
 - Developed key modules: Pomodoro Timer, Task Manager, Habit Builder, Finance Tracker, and Kanban Board.
 - Implemented real-time syncing and dashboards using Supabase with a modern responsive UI.
 - **Tech Stack:** Next.js, TypeScript, Supabase, Tailwind CSS, Radix UI, Hero UI, Recharts, Vite
- **Confidential Feedback System (Senior Project)** 2025
ATA IT Limited — (Private source)
 - Engineered a secure feedback platform with RBAC, NLP sentiment analysis, and multi-role dashboards.
 - Designed microservices for user, feedback, analyzer, and project modules with Spring WebFlux and FastAPI.
 - Implemented asynchronous NLP processing and integrated PostgreSQL + MongoDB for structured/unstructured data.
 - Built admin analyzer interfaces with dynamic insights and feedback workflow visualizations.
 - **Tech Stack:** Java (Spring WebFlux), Python (FastAPI, NLP), PostgreSQL, MongoDB, Docker, Next.js, Tailwind CSS, Hero UI, ReactBits

- Sport Complex Management System (Platform Dev Course)** 2024
github.com/6531503042/sport-complex — *Lead Developer*
 - Designed and led development of a modular, scalable booking system for university sports facilities.
 - Built core services: User Auth, Booking, Facility, Payment, and Notification, with async communication via Kafka.
 - Implemented admin dashboard and public interface using Next.js, Tailwind, and integrated Redis caching.
 - **Tech Stack:** Go (Echo), gRPC, MongoDB, Redis, Kafka, Docker, Kubernetes, Next.js, Tailwind CSS
- ReadRealm – Book Manga Platform (Personal Project)** 2024
Personal Project — (Private source)
 - Independently built a full-featured book and manga reading platform with VIP membership, coin system, and personalized user experience.
 - Implemented Golang backend with MongoDB, featuring content delivery, JWT auth, and modular CMS.
 - Designed admin dashboard for managing books, authors, monetization, and platform settings.
 - **Tech Stack:** Golang, MongoDB, REST API, JWT, Tailwind CSS, Admin Dashboard UI
- Deap – Dental Appointment App (Mobile App Course)** 2023
github.com/6531503042/Deap-Mobile-Application
 - Built a cross-platform mobile app using Flutter for booking dental appointments, managing user profiles, and posting dentist reviews.
 - Integrated Firebase services including Auth, Firestore, and Realtime DB for secure user authentication and real-time data sync.
 - Designed clean, user-friendly interfaces for appointment scheduling, doctor profiles, and review systems.
 - **Tech Stack:** Flutter, Dart, Firebase Auth, Firestore, Realtime Database
- Go Clean Architecture – Modular gRPC + REST API Framework (Personal Project)** 2025
github.com/6531503042/Go-Clean-Architecture
 - Engineered a Go Fiber-based starter project applying Clean Architecture with modular layering, dependency injection, and context-safe global decorators.
 - Designed reusable packages for HTTP, gRPC, MongoDB, error handling, and shared middleware using best practices.
 - Supports scalable gRPC/REST services with service contracts, structured logging, and context-aware flows.
 - Planned publication as a Medium article for educational purposes.
 - **Tech Stack:** Go, Fiber, gRPC, MongoDB, REST, Clean Architecture, Middleware Decorators, Docker

WRITING & PUBLICATIONS

- Implementing gRPC Microservices with Spring Boot + Maven (Medium Article)** 2024
medium.com/@nimittanbooutor
 - Walked through setting up a gRPC-based microservice in Java using Spring Boot and Maven.
 - Covered ‘.proto’ file design, service implementation, and integrating gRPC server with modular project structure.
